11 -_rR er TREAT RET OPIN OREN

We have to ensure that we set into motion a process of education which will help create a new society where people are people and not mates or females. black or white, *21on or poor.

How can the various organisations seeKning representation be accommodated?

We could relate to these organisations, or we could ask for their direct representation, or we could work towards a goal whereby they would be adequately -represented in 2 new dispensation, but whatever the means, the important issue is the creation of 4 new consciousness among all of us, so that we can see issues with a common vision.

re suggest that in deliberating on the issues at hand we
