Garment Factory

06/09/89.

The Treasurer General
Lusaka.

Dear Cde T.T. Nkobi

RE: Cotton Cloth and Transport.

Our workers in the A.N.C. enterprise convey revolutionary greetings to you, especially now when our factory is becoming a reality.

Ever since its establishment in 1983, we can today record a great expansion, also in terms of skilled personnel. The two expatriates from Finland who are with us in this [~]tr[^]ech are scoring victories as per agreed with Taksvarki Committee.

After a series of consultations with my colleagues and counterparts in the region, it was then felt that for the benefit of the factory to operate smoothly like any other business enterprise it should have its own cotton cloth and transport (preferably 4 wheel drive land cruise).

Finanida was suggested as an organisation that could assist with the above mentioned items. If there are other sources where this material assistance can be made available, surely we shall appreciate it.

Cde TG. We are all convinced that once these request is attended by your office, we shall emerge from the trenches being more strengthened and ready for any challenge that our revolution can assign us with.

We trust that these matter shall be treated by your office as one of the priorities.

In the Year of Mass Action for Peoples Power.

Yours Comradely

Sonny Leshika.....

Manager.
