

SEA VIEW

Sea View Cottage, a replica of the wood and iron cottage at 23 Southend Avenue in Sea View, is one of the attractions at the Natal Maritime Museum. In June this year a number of Durban business concerns expressed their enthusiasm and support for the Natal Maritime Museum when they generously donated the components of the Cottage. The structure was first seen at the NBS House & Garden Show between 7â\200\22418 July before it was whipped down and reconstructed on the quayside in time for the official opening on 5 August 1988.
