THE UGLY incident in which two white men snapped their nerve and went out killing blacks with iron rods in Randburg, near Johannesburg, is exceptional, but is an awful reflection of a society obsessed with' race.

The kindest thing to say is that perhaps these men were social deviates, probably under the influence of drugs. The fact that this kind of thing happens so infrequently is perhaps also a compliment to the resilience of South Africans who are forced by law to live apart and thus create certain stereotypes about one another.

On the other hand, there are obviously other incidents of race violence that go on unreported, until somebody is literally beaten to death. We thus note with unease the tensions that are lying underneath the countryâ\200\231s seeming orderliness. We have reason to believe that as the country lurches from one crisis situation to another, such scenes could become ever more frequent.

The blandishments that are used to explain such acts can, and probably will, be supplied quite readily.

The police have launched a man-

- hunt for these men, and it is our

hope that the law acts with speed. The trouble with such incidents is that, although they are rare, they are quick to ignite sublimated feelings of race antagonism.

The law much be seen to be doing

jts work with speed. It is very easy

for blacks particularly, to wish to

believe that the law discriminates

against them. This is not an unreasonable supposition under the circumstances. The cause is the separation of people under the legal constraints of the apartheid laws. -

We are not suggesting that were apartheid to be scrapped people of

\_ different races would be thrown into  
- each otherâ\200\231s arms. We believe most  
~ people respect their separate identities, that perhaps all of us would  
\_ rather be with those we are comfortable with than try and crash race or  
\* tradition barriers that are as natural  
\_ as day separates night.

It seems however that the people of this country on the whole are schooled from childhood to have a rather jaundiced view of people of

other races.

This is seen with some drama when there is unrest. Many children believe that all white South Africa is represented in the persona of police cars and Hippo armoured vehicles.

It is also not unreasonable for white children and some adults to regard blacks with negative feelings of fear which, if unchecked, degenerates into the type of hate shown by those two white men. %

Most people are normally not out of their minds to go about Killing others, however deep the indoctrination of race separatedness goes. In fact South Africans normally confront foreign visitors with their seeming openness and friendliness across the colour line. !
