In addition the ANC would like to suggest that these settlements be administered in such a way as to serve the needs of the SADCC , and thereby the region as a whole. In this way some South African Africans could continue to benefit from the facilities as a living link between our past and our future. One of the consequences of the standards set by us, is that maintenance of the settlements will require ongoing and substantial human and financial resources. We estimate that this will require donor participation for at least a further two years.

To facilitate this the ANC would like to suggest the establishment of a Working Group to manage the pre-handover period. The group should be comprised of representatives of the Tanzanian Government, Party and the ANC. The Terms of reference should be:-

- a to recommend the future use of of Dakawa and Mazimbu
- a to establish a joint management structure during the transition to handover

- a to establish a joint mechanism for the period after handover when a small core of ANC counterparts will be willing to remain. These will be particularly concerned with maintenance, farming and small scale production planning and co-ordination with donors
- t making arrangements for the handover ceremony

We thank you once again for the contribution you have made to the struggle for liberation in our country. We hope that these suggestions meet with your approval and that the Dakawa and many years to come.

Hazimbu settlements serve the needs of the people of Tanzania for//
