ADULT KITCHEN

Daily supplies were scanty as the young mothers are breast feeding and should have more food than an ordinary person. To improve that we have drawn a menu with the help of the young mothers in the kitchen and they have promised to cook the food and not leave it to rot or dry up as they are sometimes lazy to cook.

Mealie meal supplies is a real problem. *Doodles/Amri.*

FACILITIES : The kitchen needs gauze wire right around the windows, flies go in and out freely as the place is open.

SUMMARY : I was shocked when comrade Doodles confronted me with a letter on 12/5/83 which stated that there are 8 established kwashiokor cases and 9 children who are at risk, which was not true, these children are given vegetables and fruit every day as far as my records say, I see no point of us having such cases if the children are properly fed.

Anyhow, as comrade Doodles was annoyed with me I went to check with the medical people in the Charlottes and was told that there is no such thing they only disclosed that there are children who are under weight because of malaria.

ILALA KITCHEN : This kitchen caters for ANC workers within the complex.

The head of this team is very weak. Mantombi

FACILITIES : are there but not used properly.

CLEANLINESS: ~~NIL~~ Improved

DAILY SUPPLIES : adequate but left to rot, store room not cleaned (help really needed.

SUMMARY : This place is as good as not having a kitchen staff. I have tried to switch them with the Somafo kitchen staff , they work when they are at Somafo kitchen but when they go back to the nursery / primary kitchen they flop. There is a great waste in this kitchen.
