COMMISSION ON REGIONS

REF: 1/11/ 20 / 319

It is our submission that a merger between the Northern Cape and the Western Transvaal is an Economically viable option.

We noted that, with such a merger, a balance will be created between the rural and urban character of the two regions. This will be creating the potential for functionality and economic viability. It will be a creation of a more manageable unit at that level and the emergence of a region with an increased industrial base which generate revenue for the north-western region which we prefer it to be called Northern Cape.

This option is the most viable. It would enhance the potential of economic development in the region and lessen dependence on the centre. We are not urging here that the region will rely on its own tax base.

We in POSTMASBURG wish to submit that the functionality of this region is only possible when the two regions, Northern Cape and Western Transvaal merge with Mafikeng as a regional centre.

WE NEED TO POINT OUT THE FOLLOWING LINKAGES BETWEEN THE TWO REGIONS

EDUCATION: Currently the two regions are administered jointly through the D.E.T Office in Potchefstroom. This shows that there are good communication links between the two regions. This is an important factor.

AGRICULTURE: (Maize) There is clear economic coherence through this product between the two regions. This proves that the two regions are functionally interdependent to each other. Therefore a merger would be a formal way to create a strong and coherent region in terms of administration and planning.

NB: We are prepared to come and make an oral submission to the commission as a matter of urgency.
