Dear Manuela

We are very glad to learn that you are coming to Mazimbu in connection with the seedoil project. Our Dar Es Salaam office has been notified and I hope you will be cleared with the government officials.

We have already allocated 90 hectares of land for the sunflower seed we are going to plant for this project. In the past few days we have been having consultations with the Tanzanian institutes around Morogoro. We already have information about the types of sunflower seed with a high oil content and how best it's cultivated.

Did Hivos receive a telex from Mazimbu requesting for a catalogue of seedoil extracting machines (Cecoco type)¹/₂. Are you going to be helpful in connection with costing the machinery- the different parts of the Cecoco and the currency involved is a bit not clear in the feasibility study. Other questions concerning the project will be concluded when we meet in Mazimbu.

Welcome to Mazimbu.

Regards.

From: Stanley Mngadi
