ADULT EDUCATION REPORT.

MEETING OF THE PRODUCTION UNIT. HELD ON 14th September 1984

Our Production Unit met and the main items on the agenda was introduction of the new members of the dept, i.e. permanent staff members. The following comrades have been co-opted on the permanent basis to the Adult education .

1. Comrade Joy Rabotapi
2. Mark Mark Antony Moloi
3. Carol Makhize
4. Wandile Nkankula

Our production Unit would like to commend all the people and the organs who have joined efforts with us in the campaign for permanent staff. We would like to inform all the production Units that they must rest assured their members who are our students to come and attend their lessons without fear of shortage teachers. Comrades members of the Works Committee, though we have been given the few comrades to work with us that doesn't solve our problems of staff and of course we still need more.

Roll-Call: Comrades who were present in the meeting were Richard, Tweed, Cde R. Tunga, Joy Rabotapi and Mark Antony Moloi. Cde E. Maboe was somewhat excused because he stays in Kihonda and since it is known that he is an asthmatic case and time and again it gives him problem more especially in the mornings. Cde S' bongile was absent ever since she accompanied her mother to Dar-Es-Salaam. Carol reported sick and she was excused.

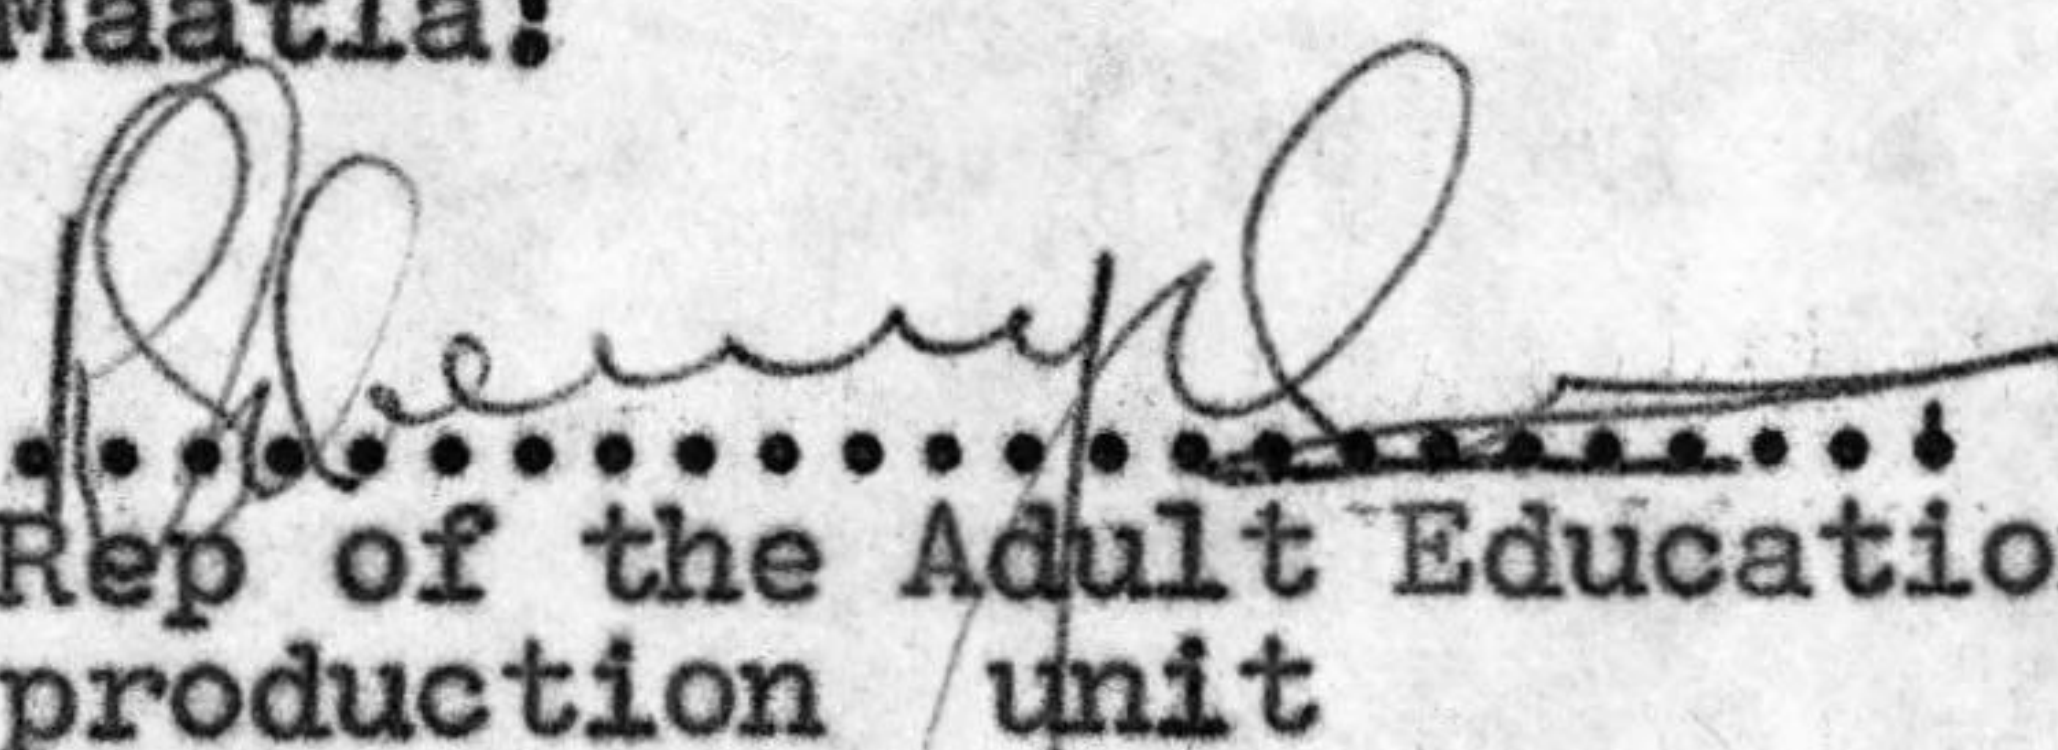

Attendance: Gradually the attendance is improving ever since the dept has been reinforced with new members, this has injected a spirit of that rejuvenated the moral of our working members. Students attendance on the Basic sector and intermediate and secondary sector varies from time to time. Our learners in the basic sector is very much up to standard with their attendance, but comrade learners on the secondary sector really it is difficult for them. One good thing we have managed to reorganise as our form 1 w class which was swallowed by the holidays. Our form IV attendance is very poor some of its members will be sitting for examination in the January next year .

Punctuality:-this question has been one of the most controversial issues in the Adult Education classes, comrades learn time and again have not been punctual and this has contributed much in the present rift between the teachers and the students blaming one another.

ATTITUDE:-The attitude of both the staff and the remaining students is improving, it's unlike before. Our administration staff is still lagging behind, but we hope that in due course we will solve the problems. The inconsistency of our students to their lessons somewhat reflect their attitude though this is coupled by the objective problems they faced with. Our Production unit would like to apologise for not maintaining the monthly statistics this has been engendered by some factors which were beyond our own control, but we hope that since we have found a new working place the problem will be soon eradicated.

GENERAL :-This month there has been positive developments as pertaining to staffing of the department and working place. The A:E has been offered the place which was used by an ILO expert for secretarial course as our new office, secondly we have been reinforced with four comrades who will now act as permanent teachers. Relatively speaking our problems have been met to a certain extent. Finally I would like to remind the Production Units that our commission is still awaiting the suggestion.

In the year of the Women, forward to the people's Government
Maatla!
