HEALTH SECRETARIAT

**ADVANCE TO PEOPLE'S POWER!**

PROJECT JUSTIFICATION

The ANC Department of Health is charged with the health care of its people in exile. The emphasis is primary health care which involves the community and a multisectoral approach to primary health care.

The health care is for the estimated 9,000 South Africa refugees in Angola. In addition there is an estimated 1,000 thousand South African refugees in Zambia. Though this South African racist regime pressvises the people inside South Africa to leave the country as seen by the state of emergency, students boycotts and so on.

In Tanzania there are more than 300 children under the age of 5. The primary school has an estimated population of 200 whilst the secondary school has over 400 students in Mazimbu 10K/Meters from Morogoro.

In Dakawa the projected population is 10,000-presently it is about 5 to 6,000 of children, women, males with diseases typical to a tropical climate including old age health problems and mental problems. Physical disabilities are present.

PROJECT PROPOSAL FOR COMMUNITY WORK BASED ON PRIMARY HEALTH CARE AND  
HEALTH EDUCATION IN THE THREE REGIONS
