,Clase-Up was able to make a detailed

examination of the Liberation Committee's

books and accounts in Addis Ababa and

discovered that levies had not been paid by some member countries for several years. in fact. the grand total of \$565,000 showed a deficit of \$135,000 on the annual \$700,000 target figure. an indication of the number of levies the Committee knows will not be paid. The reason for the back-sliding is simple. Many O.A.U. members, such as the Ivory Coast, have "moderate" Governments which have expressed concern at the increasing Communist influence. Other members ordered independent inquiries into the manner in which the liberation movements proposed to use the CAM. money. Some, like President Senghor of Senegal. were horrified to learn that in some cases Communist military experts were training not only guerrillas for the Southern Africa struggle but revolutionaries from their own countries. Moderate members apart. the fund is also missing contributions from some of the more militantly socialist member countries which pay elaborate lip service to the struggle.

Ominous footnote

The Liberation Committee's proposed allocations for the "freedom" fronts are shown here (see table) for the first time. The Committee intends slashing all aid by 10 per cent. in its 1969-70 budget with the exception of the Mozambique movement, ' FRELIMO (receiving an increase of 525,000. presumably because it is currently the most militarily active at all the movements), and the "freedom fighters" of Portuguese Guinea, where an increase of 20 per cent. is being requested. Ominously. the Committee accountants add a footnote urging a "deeper inquiry" into the accounts of the Angola liberation movement. M.P.L.A.. and its rival. G.R.A.E., the "Angolan Government in Exile."

Some amounts allocated by the Liberation Committee tend to look slightly hysterical when one sets them against the the African National Congress was in its second

Canon Collins recalled signing a

for help last year. but he refused to dis-  
close the precise amount paid by the  
fund to the liberation movements.

"I do not wish to discuss the break-

what the South African Government is  
anxious to have. They have never liked
