REPORT ON ANC STUDENTS' STUDIES DURING THE ACADEMIC YEAR 1988-89,
SPONSORED BY THE "WITHOUT A HOME COUNTRY" PROJECT

(General : Study week = average study input of 40 lectures/week;
there are between 25 - 30 study weeks per academic year; the
completion of a university degree requires 160 study weeks which
normally means 6 years at university)

WANDILE NKANKULA:

Wandile arrived in Finland in October of 1985 and commenced adult
education studies at Tampere University in the autumn of 1986.

During the past academic year Wandile has completed six examinations
and has been awarded the grade "Good" for all of them; this represents
16 study weeks (more than any other scholarship holder). This is,
however, only half of Wandile's previous annual achievements
(1986-87 = 27 study weeks and 1987-88 = 29.5 study weeks). After three
years of study, Wandile's total is 72.5 study weeks. During the summer,
Wandile had a study-related position at the Kuru forestry school. In
addition, Wandile is the chairman of the ANC scholarship holders in
Finland.

GERALD MOHLALA:

Gerald arrived in Finland in October of 1986 and commenced pedagogical studies at the University of Jyvaskyla in the autumn of 1987. By the end of the first year, he had completed 15 study weeks, but during the past year only five, albeit all with the grade "Good". After two years at university, he has a total of 20 study weeks. Gerald has had very big problems with the use of alcohol and money. Earlier on this year he was warned that he may be dismissed from the university dormitory because of bad behaviour (for playing his stereos too loud).

We have had serious discussions with gerald concerning his problems.

Mohamed Hussein, ANC's representative in Finland, has also been informed and he has issued Gerald with a written warning. During the summer, gerald had a job in Helsinki in order to improve his financial position and it seems that he has "pulled his socks up" during the summer.

Nevertheless, the "Without a Home Country" Project is of the opinion that Gerald's scholarship should be discontinued at the end of 1989

UNLESS HIS SCHOLASTIC ACHIEVEMENTS IMPROVE CONSIDERABLY AND HE IS ABLE TO GET HIS FINANCES IN ORDER.

CYNTHIA BOOM:

Cynthia arrived in Finland in the autumn of 1987 and commenced studies at the University of Jyvaskyla's Faculty of Education in September of 1988. During the past first year at university, Cynthia has sat for nine examinations and has received the grade "Good" for all of them. This represents a total of 14 study weeks. During the summer, she was a trainee at a summer camp for children and in August she travelled to Amsterdam to see her relatives.

BARNEY MOGANE:

Barney came to Finland at the same time as Cynthia and in the autumn of 1988 he commenced the compulsory practical period required in the syllabus of the Raahe data processing school. The practical period during which he was employed in a private company lasted the whole year and Barney completed it well. In the spring, he passed the school's entrance examination and theoretical studies are due to start in the autumn of 1989. During the summer, he worked in a factory in Raahe. He continues to be sponsored by the "Tekniikka elamaa palvelemaan" organisation (transl. Technology in the service of life). Barney's command of Finnish is better than that of any of the other scholarship holders.

In addition to their carrying on with their studies, all scholarship holders have been actively involved in visiting schools and telling about the ANC and the struggle for liberation in southern Africa and in events arranged under the auspices of the "Without a Home Country" Project.
