the NOSC plan to produce 3000 top

The community based parents/teachers and students organisations registered disgust and protest. It forced the parents, teachers and students to form an alternative school sports structure. Its first national non-racial school sports tournament took place on the 1st April 1990 at Bisho/Ciskei where 2000 participated in various , athletic track and field events under the administration of the NOSC and democratic sports masters of (NEUSA) National Education - Union of South Africa.

After that tournament which was very successful the NOSC realised that it will have to implement a programme to give effective direction to implement its aims:

t To give all who desire access to the best possible coaching and equipment eg. shorts, vests and spikes.

T To cultivate the talent which emerges and build it to the highest possible level.

T To draw on all willing administrative resources to promote the aims of the NOSC. 7

T To conduct needs analyses through research and assessments, and develop short, medium and long term plans to meet the needs to develop our deprived young talented oppressed youth.

T The NOSC is now in the process of implementing track & field project with the funds granted by International Community.

t The NOSC assures International Community that the funds will be accounted for and reports on all coaching programmes in various regional areas will be administered by the coaching and technical athletics committees through the head office of the NOSC.

The areas ear-marked for this developing track and field programme are the following:

1. Soweto which consist of 8 zones and population of 2 million with one stadium which can be utilised for athletics.

Suggested other facilities is the liberal university of Witwatersrand who has indicated that they are willing to assist and provide facilities and democratic physical education instructors to coach and train sport-masters in various aspects concerning field and track event.

3/...

Similar programme in other regions are : Natal, Western Cape, Orange Free State, Northern Transvaal, Far-Northern Transvaal, Eastern Transvaal, Southern Transvaal, Eastern Cape, Northern Cape, Border, 'Ciskei and Transkei.

The reason why track and field in all its forms is one of the most popular sports in S.A. running the main components of the sport is one of the easiest and cheapest sport in which to participate.

This project will enable us to develop our talent in this sport and we will allow all sectors of the community to utilise the resources which until now have been for the exclusive use of the privileged sectors, (e.g. funding).

But best of all it will equip a large section of our sporting community to prepare and develop to participate and represent our country in the post-apartheid S.A eg. Olympic games and all other international track and field events as one people, one nation, one country, one flag and democratic non-racial S.A.

We thank International Community for being the first to support a project which will benefit all South Africans , we thank you once again.
