AQQQQ EDUCAEIOE REEQBI.

Our Production Unit met and the main items on the agenda was introduction of the new members of the dept. i.e. permanent staff members. The following comrades have been opted on the permanent basis to the Adult education .

1. Comrade Joy Rabotepl
2. Mark Marx Antony M0101
- h. Wandile Nkanknle

Our production Unit would like to commend all the people and the organs who have joined efforts with us in the campaign for permanent staff. We would like to urge all the production units that they must ensure their members who are our students to come and attend their lessons without fear of shortage teachers. Comrades members of the Works Committee, though we have been given the few comrades to work with us that does not solve our problems of start and end or cause we still need more.

39:Q3:800 comrades who were present in the meeting were Richard. Tweed, Cde R. Tunga, Jey Rebotepi and Mark Antehy M9101. Cde E. Maboe was somewhat excused because he stays in Kihonda and since it is known that he is an asthmatic and time and again it gives him a problem more especially in the mornings. Cde S' bonglle was absent ever since the 3 She accompanied her mother to Derby - Salann Carol reported sick and she was excused.

Aggggggggg gradually the attendance is improving ever since the dept has been reinforced with new members. This has injected a spirit of that rejuvenated the morale of our working members. Students attendance on the Basic sector and intermediate and secondary sector varies from time to time. Our learners in the basic sector is very much up to standard with their attendance, but comrades learners in the secondary sector really it is difficult for them. One good thing we have managed to reorient sets as our term 1 class which was swallowed by the holidays. Our form IV attendance is very poor some of its members will be sitting for examination in January next year .

OIOOCZOOIIOQ000I

Whittle quest ion has been one of the most controversial issues in the Adult Education classes, comrades leemeas time and again have not been punctual and this has contributed much :1 in present rift between the team s and the students blaming one another.

ATTIwDEtuThe attitude of both the a staff and the remaining students is improving. Its unlike before .Our administration staff is still lagging behind, but we hope that in due course we will solve the problems. The inconsistency of our students to their lessons somewhat reflect their attitude though this is coupled by the objective problems they faced with. Our Production unit would like to apologise for not maintaining the monthly statistics this has been engendered by some factors who were beyond , ' .. our own control, but, we hope that since we have found a new working place the problem will be soon eradicated.

GENERAL :oThis month there has been positive developments pertaining to staffing of the department and working place. The ME has been offered the place which was used by an 11.0 expert for secretarial course as our new office, secondly we have been reinforced with 1'. four comrades who will now not as permanent teachers. Relatively speaking our problems have been met to a certain extent. Finally I would like to remind the Production Unit that our commission is still awaiting the suggestion.

. In the year of the Women's Forward to the people's Government
