DATE: 10 February, 1993

Ref:

We attach a copy of DANCHURCHAID'S response to our proposal that steel structure buildings Not be transferred to the Ka Ngwane Project and Doomkuil farm project, but rather:

1) THEBE take over the structure in Tanzania for use in their joint venture at Puqu Road plot, DSM.

2) THEBE Supply steel structure buildings of equivalent value for erection in Ka Ngwane and Doomkuil.

We have requested THEBE to propose how this transfer should be structured and hope for a response by Thursday, 11 February.

DACHURCHAID will meet with the Danish Government on Thursday afternoon or Friday morning to seek approval for the above.

BeSt Regards. The People Shall Govern !

February 4, 1993  
.Dear Mr. Mvusi,  
Thank you very much for the project proposal concerning the  
erection of steel constructions at the Kangwane School  
Project.Kangwane seems to be a very appropriate project to ben-  
efit from the remaining resources of the previous ANC schools  
in Tanzania. I only have one remark concerning the actual  
project proposal. It concerns the structures for One small ma-  
chinery hall which was brought to Tanzania together with the  
rest do not seem to be included in the proposal. According to  
Mr. Nordbo the structures are still to be found in Tanzania.  
Kindly explain.  
I have been trying to get in contact with you in Dar Es Salaam  
through NPA and TCRS without Success. Yesterday I called your  
Johannesburg office no success either. I would like to discuss  
the various possibilities concerning the project.  
.I share your concern that implementing the transfer of steel  
structures may be a daunting task particularly from a logisti-  
cal point of view.  
In your fax of 13 January 1993 you suggest that a Tanzanian  
consortium takes over the structures against 'supplying and  
erecting' a similar structure in South Africa. I assume that  
means that the amount a sale of the structures would bring in  
then would be transferred to South Africa for use in the  
Kangwane project.  
It is indeed an interesting proposal. In order to pursue this  
further we would need solid information on the parties and the  
actual transactions involved, and lf agreed upon possibly a  
partner in Tanzania e.g. TCRS to oversee the transactions on  
behalf of Danchurchaid.

Whatever solution is decided upon we are in need of budget estimates. We cannot proceed without budget estimates. This is crucial in order for DCA and DANIDA to get an idea of the costs involved. This was already mentioned in my letter of October 21, 1993 addressed to Mr. Tikly.

In view of the logistics involved in the original proposal to transfer the structures DCA would prefer above arrangement if all transactions can be assured and documented.

If this option for one reason or the other would turn out to be inappropriate we would then still need of cost estimates related to a possible shipment of the steel structures.

. I believe that there is a great need for all parties involved to reach an agreement soonest possible. I appreciate the work that has been done already knowing it is very time consuming. It would be very useful to discuss the matters on telephone as soon as possible. I'll keep trying to get thrOugh to yOu.

/Xogrs s'ncepely,
