re: MR. MOUNTBATTEN QINA
OSTEO ARTHRITIS OF THE RIGHT HIP.
4m rV.A._.-_...n

Thank you for asking me to see this patient who was injured on the right knee in 1983. He subsequently developed pain with difficulty in movement of the right hip. This has caused some partial fusion of the hip joint. Apparently, he was seen by a doctor in Eliotdaie who referred him to Addington hospital, Durban. Here, it was decided that he needs 3 TOTAL HIP REPLACEMENT to sort out his problem of pain and lack of mobility. This is an extensive operation of the hip joint which is quite involved and complicated and it needs specialists' attention and preferably in a specialised institution.

I have made some enquiries as to the cost of this form of management and have received quotations in the neighbourhood of R15 000 if this is done privately. The cost could be much more cheaper if this is done in a public institution like a Government Hospital. Mr Qina needs this form of management so that he becomes totally independent and self sufficient.

sider thfsxand I wnl make the necessary arrangements m respect
