Dear Friends

We happened to have come across your publication "Southern Africa Information Service" of January-June 1973 and found it most interesting and valuable for our daily work, as a source of information, being cut off from our country and its News Media, makes our work difficult.

We wonder if you could be kind enough to place us in your mailing list for regular copies to keep us abreast of events in Southern Africa.

We highly appreciate the enormous amount of effort it causes to produce such a scientific publication, which means extensive research for facts. Please keep it up.

Kindly send it to the above address until further notice.

With warm regards and thanking you in anticipation.

Yours sincerely

Florence Mophesho
