

20.2.92

Dear Sirs

I am a concerned Swedish citizen having lived in this country since 1957.

Having lived in Hitler ^{Russian or} Germany being a refugee in Sweden and experienced South African Politics it seem clear to me that one should move away from power politics and go for economic power, education Housing and population growth cont.

If population growth is not handled soon, no money in the world will ever bring this country on a prosperous path for all its people.
These ideas...

in the least meant to be racist
only realistic, as everyone in this
country should lead a free life with
equal rights.

Yours faithfully

J. O. Lissner
