Dear comrade

RE: PRINTING EQUIPMENT

Following discussions between our Office in Luanda and cde. Markku Vesikko on the Development Programme of the ANC Printing shop - Luanda, please find herein enclosed technical specifications of the required printing equipment.

The document is self-explanatory, and should a need arise please feel free to consult with the Office of the Treasurer General (Projects) in Lusaka as the comrades have a copy of the document.

Thanking you in anticipation of your continued assistance.

Yours comradely

Ben Ratle
Regional Project Officer

c.c. Regional Treasurer - Luanda.

Re: Small Printing Machine (A4 size paper) including Box 3523
paper-plate maker. 3523/

LUANDA

People's Republic of Angola

3523/18

Functions

To print A4 size of paper (+/- 100) which would, otherwise, be unproductive for a bigger machine. This type of machine is particularly useful for job orders of more than two colours.

Features and recommendations

Difficult to state as this type of machine is not available locally and therefore would appreciate your invaluable advice on it - for example, metal plates to be used and other specifications.

Concluding Notes

This small printing machine is not crucial for the day-to-day functioning of the Print-shop. Therefore this request should be treated last on the list of priorities, depending on the size of the funds available.

However it will be useful and a good starting point for our training programme although a little bit more complex than the Gestetner.

TECHNICAL SPECIFICATION
For ANC-Luapda Printing Shop Development Programme

Re: Desk Top Publishing-system

Function

System is producing camera ready originals of text and line drawing pages in A4 or smaller format.

Text is input thru keyboard using word processing program. Handling of text data is done on screen and data stored in floppy diskettes or hard disk.

Line drawing originals are input thru logo-scanner.

Lay-out is done "on screen" compiling text and drawings plus necessary lines, boxes, halftone basis, headlines etc using Aldus Pagemaker programme.

Out put print is done by laser printer.

Recommended hardware (equipment)

Apple MacIntosh DTP-system:

- a. Scanner, 300 dpi, no OCR or gray scale scanning functions necessary.
- b. MacIntosh II or later version, minimum RAM 2 Mb, hard disk 20 Mb or bigger. High resolution wide screen in black/white, color screen not necessary.
- c. Laser Writer, MacIntosh or compatible using PostScript page formation. Minimum RAM 1,5 Mb or big enough to produce full A4 size page graphic.
- d. Power back up system, strong enough to cover the needs of above equipment against power cuts up to 15 minutes.

Recommended software (programs)

All programs in english.

Aldus Pagemaker, MacPaint, MacDraw, MacFonts, MacWrite, MacBrush.

Other programs recommended for disk organising, spread sheet, communications, etc, not very important.

Accessory

Tone cartridges for laser printer.

Cables for connecting the system.

Diskette cleaning set.

Diskettes 100 pcs.

Manuals and supporting literature on MacIntosh DTP-systems.

Tutor programs for MacWrite and Pagemaker programs.

Copy holder for manuscripts.

Table arm lamps 2 pcs.

Dust covers for all equipment.

Diskette storing box with lock for 100 diskettes.

Optionals

Modem for linking thru telephone.

Subscriptions for Mac User- and DTP magazines.

Electrical system

220V/50 Hz.

5x1,5 rubber covered cable, 50 m.

Wall sockets, double connections, earthed, 4 pcs.

Extension cables, 3 m, 2 pcs.

TECHNICAL SPECIFICATION

For ANC-Luanda Printing Shop Development Programme
18.7.1988 by Markku Vesikko

Re: Collector/sticher/folder-system

Function

Collects A3 raw size printing sheets, sends to sticher and folder.

Easily operated automatic system with few electronically controlled functions.

Collecting system

Vertical or horizontal pockets, each minimum for 200 sheets.

Horizontally mounted system recommended because of less mechanically moving parts.

Size A3 plus trimming edges.

Stiching system

2-stiches, capacity for 2 to 40 sheets.

Mechanical control for stitching timing.

Stiching wire in standart rolls.

Folding system

Knife folding.

Mechanically controlled folding timing.

Accessory

Paper path belts, paper guides and holders, suction rubbers and valves (if used), spare knife, spare stitching heads, all rubber rollers for paper transport etc.

Switches, fuses, 3-phase rubber cable 30 m, wall mounted security switch.

Instruction and maintenance manuals with electric plan.

Data of Agency of machine in Luanda and source of spare parts.

Other features and recommendations

Light cells and touch sensors are extremely sensitive to humidity and general conditions of the printing shop.

Equipment of this origin are usually made for heavy office use and are rarely used in commercial printing shops. When estimating the production of ANC printing shop, equipment of this nature is however recommended.

TECHNICAL SPECIFICATION

For ANC-Luanda Printing Shop Development Programme

Re: Folding Machine

Function

Folding A2 size paper down to maximum 16 magazine pages. All functions of machine should be mechanical. Electronic controllers such as light sensors or paper surface speed sensors are not recommended. Speed control mechanical.

Feeding system

Automatic, suction by sheets or roller suction. Manual feeding is also recommended
Size A2 plus cutting edges.

Folding system

Full pocket or pocket/knife.

Other features and recommendations

Machine can be second hand when purchased but must be fully serviced before despatch. Electric motor/s should be replaced if older than 3 years.

Reliability and easy handling should be decisive features, speed is not important.

Accessory

Paper path belts, paper guides and holders, suction rubbers and valves (if used), switches and fuses.

Data of origin of machine, maintenance and service manuals, data of agency in Luanda and source of spare parts.

3-phase rubber cable 30 m and wall mounted safety switch.

Paper trolleys for A2 size paper, 4 pcs.
