11 /01/84

Our Rafi: FLORENCE MOPHOSHO 55Y/F

Ybur Ref; MEDICAL REPORT.

The above-named patient was admitted in your hospital from the 29th Sept, 82 to the 9th Dec, 82.

CLINICAL DIAGNOSIS , H t

Ca of the antrum, subtotal resection of the stomach on 27/10/82, Chronic Hepatitis, Chronic Otitis, Ischaemic heart disease, Effort Sternocardia, atherosclerosis of the coronary arteries, Deforming spondyloarthrosis, atherosclerotic cardiosclerosis, atherosclerosis of the aorta, subserous myoma of the uterus, Deforming spondyloarthrosis lumbo-cervical Spine, ' general osteoarthrosis, Deforming lipoarthrosis of the knees and ankles joints, varicose veins of the lower limbs (shins), chronic cystitis.

One week ago the patient developed severe intermittent, colicky abdominal pains. As a result she was put on Pro-Banthin 15mg tds, Buscopan 1tab tds and Buscopan injection with very little effect.

In view of the above diagnosis and colicky abdominal pains one cannot exclude a catastrophe in the abdomen, the patient is therefore recommended

reinvestigation and treatment abroad.

Yours sincerely,

I
