Dear Mr. Manyanga,

Re: Vocational Training

Thank you for your letter dated 31/5/93 and I apologise for this delayed response.

As you are aware we were planning to send former trainees of the Dakawa VTC back to Tanzania for more advanced training. A donor had agreed to provide their costs (fees, maintenance and a stipend) but was not able to pay the airfare to Tanzania. We approached other donors who also are not able to defray airfares.

. . kx.

For thls reason, we cannot send tralnees to Tanzahla. Our sincere thanks for the detailed information contained in your letter.

African National Cogress for the support the National Vocational Trainlng Division of Tanzania gave to many exiled trainees and towards the development of the ANC's Vocational Training Centre af Dakawa.

We are pleased to hear that the Dakawa VTC .is functiOning smoothly. t

\_With regards,

Yours sincerely

Mohammed Tik y

Dear Mr. Tikly,

Re: VOCATIONAL TRAINING

Thank you for your letter of 4th January, 1993 with regards to the subject stated above.

2. We first wish to inform you that trainees from South Africa are most welcome to join not only Dakawa. Vocational Training Centre but also other Vocational Training Centres operating under the auspicious of the National Vocational Training Division, depending upon the field of their specialisation.

3. The following information is provided as requested in your letter.

3.1 Training at Dakawa VTC starts in January of each year.

We have two starting periods for all our VTCs. Some start in January and some in October of each year.

:: 3.2 Enclosed herewith please find a chart showing the type of trades offered in each of the 19 centres under our care. The training programme is four years (one or two years full time at a VTC followed by three or two years of apprenticeship in Industry). At the end of the four year training trainees are expected to reach full craftsmen status by obtaining National Grade I Trade Test Certificate and a certificate of Apprenticeship.

3.3 The Minimum entry requirement is successful completion of Primary Education, attained the age of 16 years, medically fit and pass our entrance tests.

3.4 Cost structure with regards to fees, maintenance and other costs will be worked out at a later stage after we have received from you a list of prospective candidates showing trade to be learnt and stage of training needed (i.e whether they are beginners or wish to take advanced training in preparation for Grade II and I Trade Tests).

3.

.5

6

.7

The number of trainees we can accommodate at a time will also depend on the choice of trades and the composition of the group (how many are for skill-upgrading and how many are for basic Vocational Training). It is suggested that you first send us a list of all your prospective candidates showing age, trade to be studied, level of training, sex etc. Tailor made courses can be arranged for all the 34 trades offered in our VTCs. As the name implies, the duration of the courses will depend on the training needs of the applicants, ranging from a few weeks to several months.

Enclosed herewith please find a copy of our application form as requested.

With fraternal greetings.

Yours sincerely,

M.H. Manyan a
