Dear Ralph

I am enclosing, for your information, a summary of a report "The Economic Impact of AIDS in South Africa", published this week by the Centre for Health Policy.

The research on which the report was based was commissioned by the Economic Trends Research Group, and was conducted during the past three months by the Centre for Health Policy, in collaboration with the Centre for Epidemiological Research of the S.A. Medical Research Council.

We will soon be publishing an abbreviated version of the report together with an updated description of the actuarial projection model developed by Mr Doyle. Copies of this monograph will be available from the Centre shortly.

Please do not hesitate to contact me should you have any queries, or should you wish to discuss the issues raised in the report.

Yours sincerely

km
