. Dear Professor Bengu
I'm posting this to you in case Denis has not sent you a
copy of his views.
I have been going through the programme for your workshops
from the 24.07.92 to 03.09.92. I think at the end of it
all the entire University Community should have been inspired
to get down to the task of rebuilding and transforming Fort
Hare. The whole project was very well conceived.
I went through your Keynote Address, and that historical
background was very good and informative.
Best wishes
