Re: Call for community co-operation in taxi negotiations

The ANC Western Cape calls on all members of the taxi associations and members of the community to support the negotiation process between the leadership of Lagunya and WEBTA.

The ANC repeats its call for all members of the community to support the speedy resolution of the problem and not be provoked by elements who do not want to see peace. Only the support and co-operation of the members of the taxi associations and the community will ensure the success of the talks and the halt to the loss of more lives.

The ANC commends the negotiating parties for working together and the progress they have achieved so far.
