re: publication on education

urgent

Dear Achmat and Jo,

Following Riet's earlier correspondence on the publication which we are preparing on your educational programmes and policies, I like to request your urgent cooperation on this subject.

As you'll have noticed from the first draft, we do not really have the information at our side to complete the publication. To make it an interesting and up-to-date document on the state of affairs of 'alternative education' (in the context of developing new educational policies, methods and structures) we need input from the people involved in the educational projects/programmes very badly.

You may not have time yourselves to actively assist in bringing this information together, but I suppose it would be possible to request a reliable and informed journalist to assist in producing the material. If needed we can provide the funds needed to give somebody such an assignment.

Please let us know as soon as possible what you can do to help the publication forward. We still hope to be able to have it ready for circulation before the end of this month. The urgency has only increased with the pressures mounting in the European Parliament, as you'll have noticed from the documents we have send in preparation for the meetings in Brussels next week.

Looking forward for your early response, and sending my very best regards,

Yours sincerely,

Roel von Meijenfeldt.
