Dear Sirs

I am writing this letter at the suggestion of Dr. Natho Motlana with whom our Company has had an association over the past several years through the management of the Lesedi Clinic in Soweto. Lifecare Group Holdings has been providing cost effective health care services over the past 40 years in the disciplines of psychiatry, geriatrics, tuberculosis, medical/surgical services, community medicine, and drug/alcohol abuse. These services are provided throughout South Africa in 35 private clinics and hospitals comprising of 15560 beds, by far the largest private health care organization in the country. The purpose of this letter is to invite appropriate persons in the Health Secretariat who will shoulder the responsibility in developing the health strategy for the African National Congress, to visit some of our facilities and to talk to the people responsible for the services we offer. We believe this exposure will create an awareness of how at least a portion of the private health sector functions. A monumental task lies ahead for the officials of the ANC who will develop this health strategy for the future South Africa. Knowledge of all facets of the health care sector will be helpful in arriving at the most logical decisions.

We look forward to hearing from you and will make time available at your convenience.

Sincerely yours

D. Tabatznik

Chairman
