1

EWe particularly welcome our guests from the Council on Foundations' Southern
zAfrica Grantmakers' Affinity Group. We wish you a good stay in South Africa
ion this important mission.

1 The objective of the Visit to South Africa cannot but benefit both the South
?Africans and the Americans. As all of you may be aware, the goal of the
mission is to facilitate access, by South Africans, to international
development experience and expertise and to gain a first hand experience and
:substantive understanding of South Africa's needs and requirements for long
' term development. .

I

This countryhas been isolated from international developments for many years.
As such, in the past, very few people, if any were able to get into contact
with many American Foundations. lhis visit will afford both sides to have a
first-hand contact, interaction, and an exchange of experiences, views and
information about develoment.

After this visit the delegation will develop a proposal for possible funding
by U.S Foundations, for a technical exchange pzogramme betmen South Africa
and the United States, and countries elsewhere in the world with instructive
development experience and will also publish a substantive report on the
potential role of private U.S foundations in seaming South Africa 's long term
development prospects and in facilitating interchange of development
expertise.

We further hope that this visit will achieve its objective of encouraging
continuous and deep interaction in future. And, more importantly, it is
expected that this interaction will eventually lead to the transfer of
technical ezqaertise and technology in the not too distant future.

After this mrlehop our guests will be travelling to Rathanda, Heidelberg.

After a site visit there they will leave for Tmneen. We wish them a nice
journey to the Eastern Iransvaal. We also thank everybody, in anticipation,
for availing yourselves to attend this worlshop.
